

Halloscreem!

Halloscreem! is Ace Murder Mystery's fantastic new board game aimed specifically at Halloween parties for kids aged around 8-13! The game requires the players to solve the murder of Crown Prince Caligula III by deducing the murderer, motive and weapon via three different methods of memory, strategy and cunning.

For extra atmosphere, the game comes with a "Scary Music" CD that can be played in the background. An additional "Scream" CD can be played alongside or instead of the music. If

a 'scream' is heard as a player makes his move, they must miss a turn.

Although the game can be played as just an enjoyable board game, it can also be played using the 'extra scary' option. Players turn their own house into Crypto Castle by nominating 5 places or rooms in their own house as the castle's corner rooms. This combination of torches, darkness, screams and scary music provides a nerve jangling experience, full of nervous excitement - and the kids love it!

This game provides a fantastic focus for a kids Halloween party in addition to the normal activities of bobbing apples or trick and treat etc.
