

## Steam over Holland

1839, The Netherlands. The new railways are the way to get rich. Players invest their money in railway companies. The President of each company has the opportunity to lead them to become the best earning company of the game. They must build railway track and stations, buy the right trains and push the stock value to new heights. Who will become the most successful investor?

*Steam over Holland* is an economics game in which the players invest in and control railway companies. The game is part of the 18xx family of games. The gameplay uses the same basic mechanics as other 18xx games. However the focus of the game is more on the operation of the companies, than on the stock market.

Produced to a very high standard, *Steam over Holland* is available in a limited edition of one thousand games, each individually numbered.
