

## Tactico

**Tactico** is the first family game to recreate the passion and rivalry that is familiar to football fans around the world. The game's 'Sport Survival' system generates a truly exciting experience and can be played with friends or family.

Traditionally, football board games use trivia as their central element, but not **Tactico**! **Tactico** is the football game for real football fans. Why? Because people love the thrill of the sport, not statistics!

**Tactico** recreates all the action, excitement and ups and downs of a football championship without complex rules. Go head-to-head with a single opponent or challenge the entire family.

Player first recruit footballers—and staff—for their team. They pit their teams against other players' teams to rise up the League table and get the coveted Captain's armband. The first to make it to the top of the League wins the game.
